

Insight 1

https://public.tableau.com/app/profile/shakhanna.johnson/viz/IncomebyState_16750894706140/Income

Design: I used a horizontal bar graph to easily compare the income from states across the US

Summary: By using this graph I found that Texas had the highest amount of income and District of Columbia was reported having the least in 2015

Resources: N/A

Insight 2

<https://public.tableau.com/app/profile/shakhanna.johnson/viz/UnemployedResidents/Unemployment>

Design: I used the map to easily see how many people were unemployed in each state

Summary: By using the map I was able to see that Texas had the highest of 1,712 with Georgia right behind with 1,586

Resources: N/A

Insight 3

<https://public.tableau.com/app/profile/shakhanna.johnson/viz/WorkEnvironment/JobTitles>

Design: The bar graph was used to easily compare the number of people that worked in an office, worked from home, and were self employed

Summary: By using this chart I was able to see that District of Columbia had the least amount of people in all three categories

Resources: N/A

Insight 4

https://public.tableau.com/app/profile/shakhanna.johnson/viz/ChildPoverty_16750893011350/ChildPoverty

Design: A scatterplot was used to compare the standard deviation reports of child poverty between black and white residents by state

Summary: From this chart I found that Texas had the highest reports of child poverty. I also grouped states together that had reports of less than 1,000 and there were 21.

Resources: N/A

Insight 5

https://public.tableau.com/app/profile/shakhanna.johnson/viz/AvgIncome_16750892690870/AvgIncome

Design: The bar graph was used to show the average income reported

Summary: This calculated chart shows that the average profit from public and private work is high. The tooltip was added to this chart

Resources: N/A

Insight 6

https://public.tableau.com/app/profile/shakhanna.johnson/viz/Dashboard_16750892392480/Dashboard1

Design: This dashboard was used to show the comparison of income, people unemployed, and children in poverty across all states

Summary: By using this I found that Texas was the highest in all three.

Resources: N/A

Insight 7

https://public.tableau.com/app/profile/shakhanna.johnson/viz/ProjectStory_16748723996380/Story1

Design/Summary: The story was created to give viewers a glimpse into my journey and my findings

Resources: N/A
